MA2800
Voice Amplifier (Black Edition)

Unique Features

Experience the difference

Features

We guarantee you the 'wow' factor when you give our voice amplifier a try. With 8 watts power coupled with a 2 3/4" aluminum reinforced speaker cone, crystal clear and undistorted voice reproduction is what you can hear.

The voice amplifier weighs simply 175 grams but is packed with most complex circuitry designs to ensure simple operation. Easy to use and ergonomically designed for comfort and style.

Don't worry about over-charging, as the amplifier will cease charging by itself upon full charge! It will notify you with a flick of indicator light from 'red' to 'green'.

How about a 1000 charging cycle for the rechargeable batteries? This works out to 'zero' maintenance cost for the next three years!

To protect your investment, the voice amplifier is covered under a two-year warranty!

- Adjustable strap with quick release buckles (sling across the body or waist)
- Stainless steel belt clip for easy fastening
- Flexi-arm neck-worn microphone piece for comfortable wearing
- Uni-directional condenser capsule to minimise unwanted interference
- AFC (anti-feedback circuitry) technology to improve gain before feedback
- ABS body for better sound reproduction
- Enhanced components employed for critical parts prone to wear and tear
- Auto-switching power supply that works in any country
